

Post Care for Sculptra Injection

What to expect:

- You can apply some ice to the area to help minimize swelling.
-A good rule is apply 5 minutes on, then 5 minutes off.
- Some small areas of redness and swelling near the injection areas is common. Some slight bumpiness in these areas is also common. This will resolve in approx 1-3 days.
- Any large amount of pain, swelling, or bruising is extremely rare. If you experience any of this, please call the office. (775) 525-1712

When will I see results:

Gradually over 4-6 weeks. The fullness from the saline in the injection will go away completely and the product will stimulate your body's own collagen regeneration.

What you need to do:

Gently massage the area of injection for 4 minutes, 4 times a day for 4 weeks.

What you shouldn't do:

There are no restrictions

Any large amount of pain, swelling, or bruising is extremely rare. If you experience any of this, please call the office immediately!
